AMNIOSLIDE

REF EKAMS60F Q.ty 60 pieces

Amnioslide is a support for the *in situ* culture of adherent cells and in particular amniocytes and *chorionic villi*. The use of SuperFrost® slide inside the culture chamber allows to perform directly, avoiding trypsinization step, chromosomal banding or molecular investigation (i.e. fluorescent *in situ* hybridisation, FISH).

Features

-  Product Description: chamber for culture and analysis of amniocytes and *chorionic villi*.
-  Packaging: each case contains 30 packages, 2 Amnioslide/pack, for a total of 60 Amnioslide, ready to use and treated with Ethylene Oxide.
-  Slide dimensions: 25x75 mm diameter; 12,5 cm² culture area.
-  Shelf Life and Storage: 2 years at room temperature
